I have answered the Health History Questionnaire questions accurately and completely. I understand that my medical history is a very important factor in the development of my fitness/wellness program. I understand that certain medical or physical conditions which are known to me, but that I do not disclose to my trainer, may result in serious injury to me. If any of the above conditions change, I will immediately inform my trainer of those changes. I, knowingly and willingly, assume all risks of injury resulting from my failure to disclose accurate, complete, and updated information in accordance with the attached questionnaire. I also understand that in order to properly risk stratify my Health History Questionnaire; my trainer should have a minimum of a national certification as a personal trainer. My trainer also verbally explained this statement to me to my understanding.

Additional Comments: \_\_\_\_\_

The **Health History Questionnaire** follows the American College of Sports Medicine recommendations for risk stratification. This must be performed on all clients in order to determine the need for medical clearance and/or exercise modifications. Any trainer or those making exercise recommendations should be certified in the proper use of the risk stratification process through a national organization.

If a client has a YES response to questions on page 1, your client has a KNOWN DISEASE, AND MUST have medical clearance prior to beginning exercise.

If your client has a YES response to question #7, a-h, on page 2, he/she is HIGH RISK WITH SYMPTIOMS and must have medical clearance prior to exercise. If your client has a YES response to questions # 8 or # 9, he/she must have medical clearance.

YES responses to two or more questions, 10 – 16; your client is HIGH RISK WITHOUT SIGHS OR SYMPTIONS and must have medical clearance (unless he/she also has a YES answer in question # 7 making them still HIGH RISK WITH SIGNS/SYMPTOMS).

All other questions on page 3 are at your own discretion. Remember, **when in doubt, refer out**. Please also refer to the most recent edition of ACSM's *Guidelines for Exercise Testing and Prescription* (Williams & Wilkins) as well as the most recent edition of *ACE Personal Trainer Manual* (American Council on Exercise) for more explanations the risk stratification. It is your responsibility as a trainer to remain updated on all changes or modifications for risk stratification in determining the need for medical clearance and exercise modifications/recommendations.
